

# The Garden

This is a topic all about **growing plants** in the **local area**. Like any good gardener, we will learn the **names** of different plants and know the **main parts** of a plant. We will plant vegetables in our edible garden and **watch how they change** as they grow.

peppers

cress

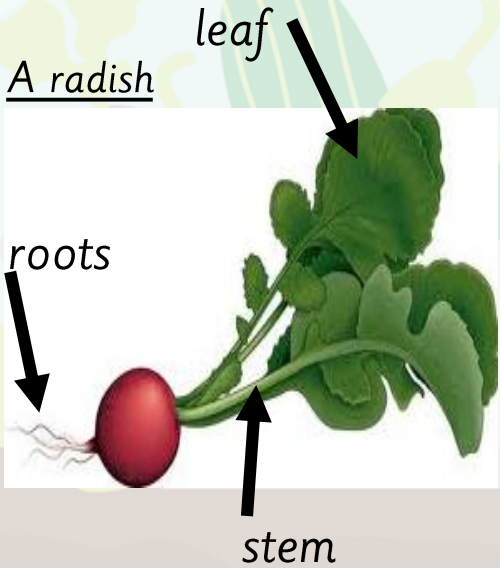

radishes

spinach

Word	Definition
edible garden 	a place that grows plants you can eat.
compost 	soil
sow 	plant seeds in the soil
harvest 	pull up plants you have grown in the ground.

A radish seed takes 4 weeks to grow into a radish. Look at how the main parts of the radish change.

In Design and Technology, we will taste our grown vegetables from the edible garden.

We will safely prepare the vegetables we like to make Rainbow Wraps.
